

SUMMARY

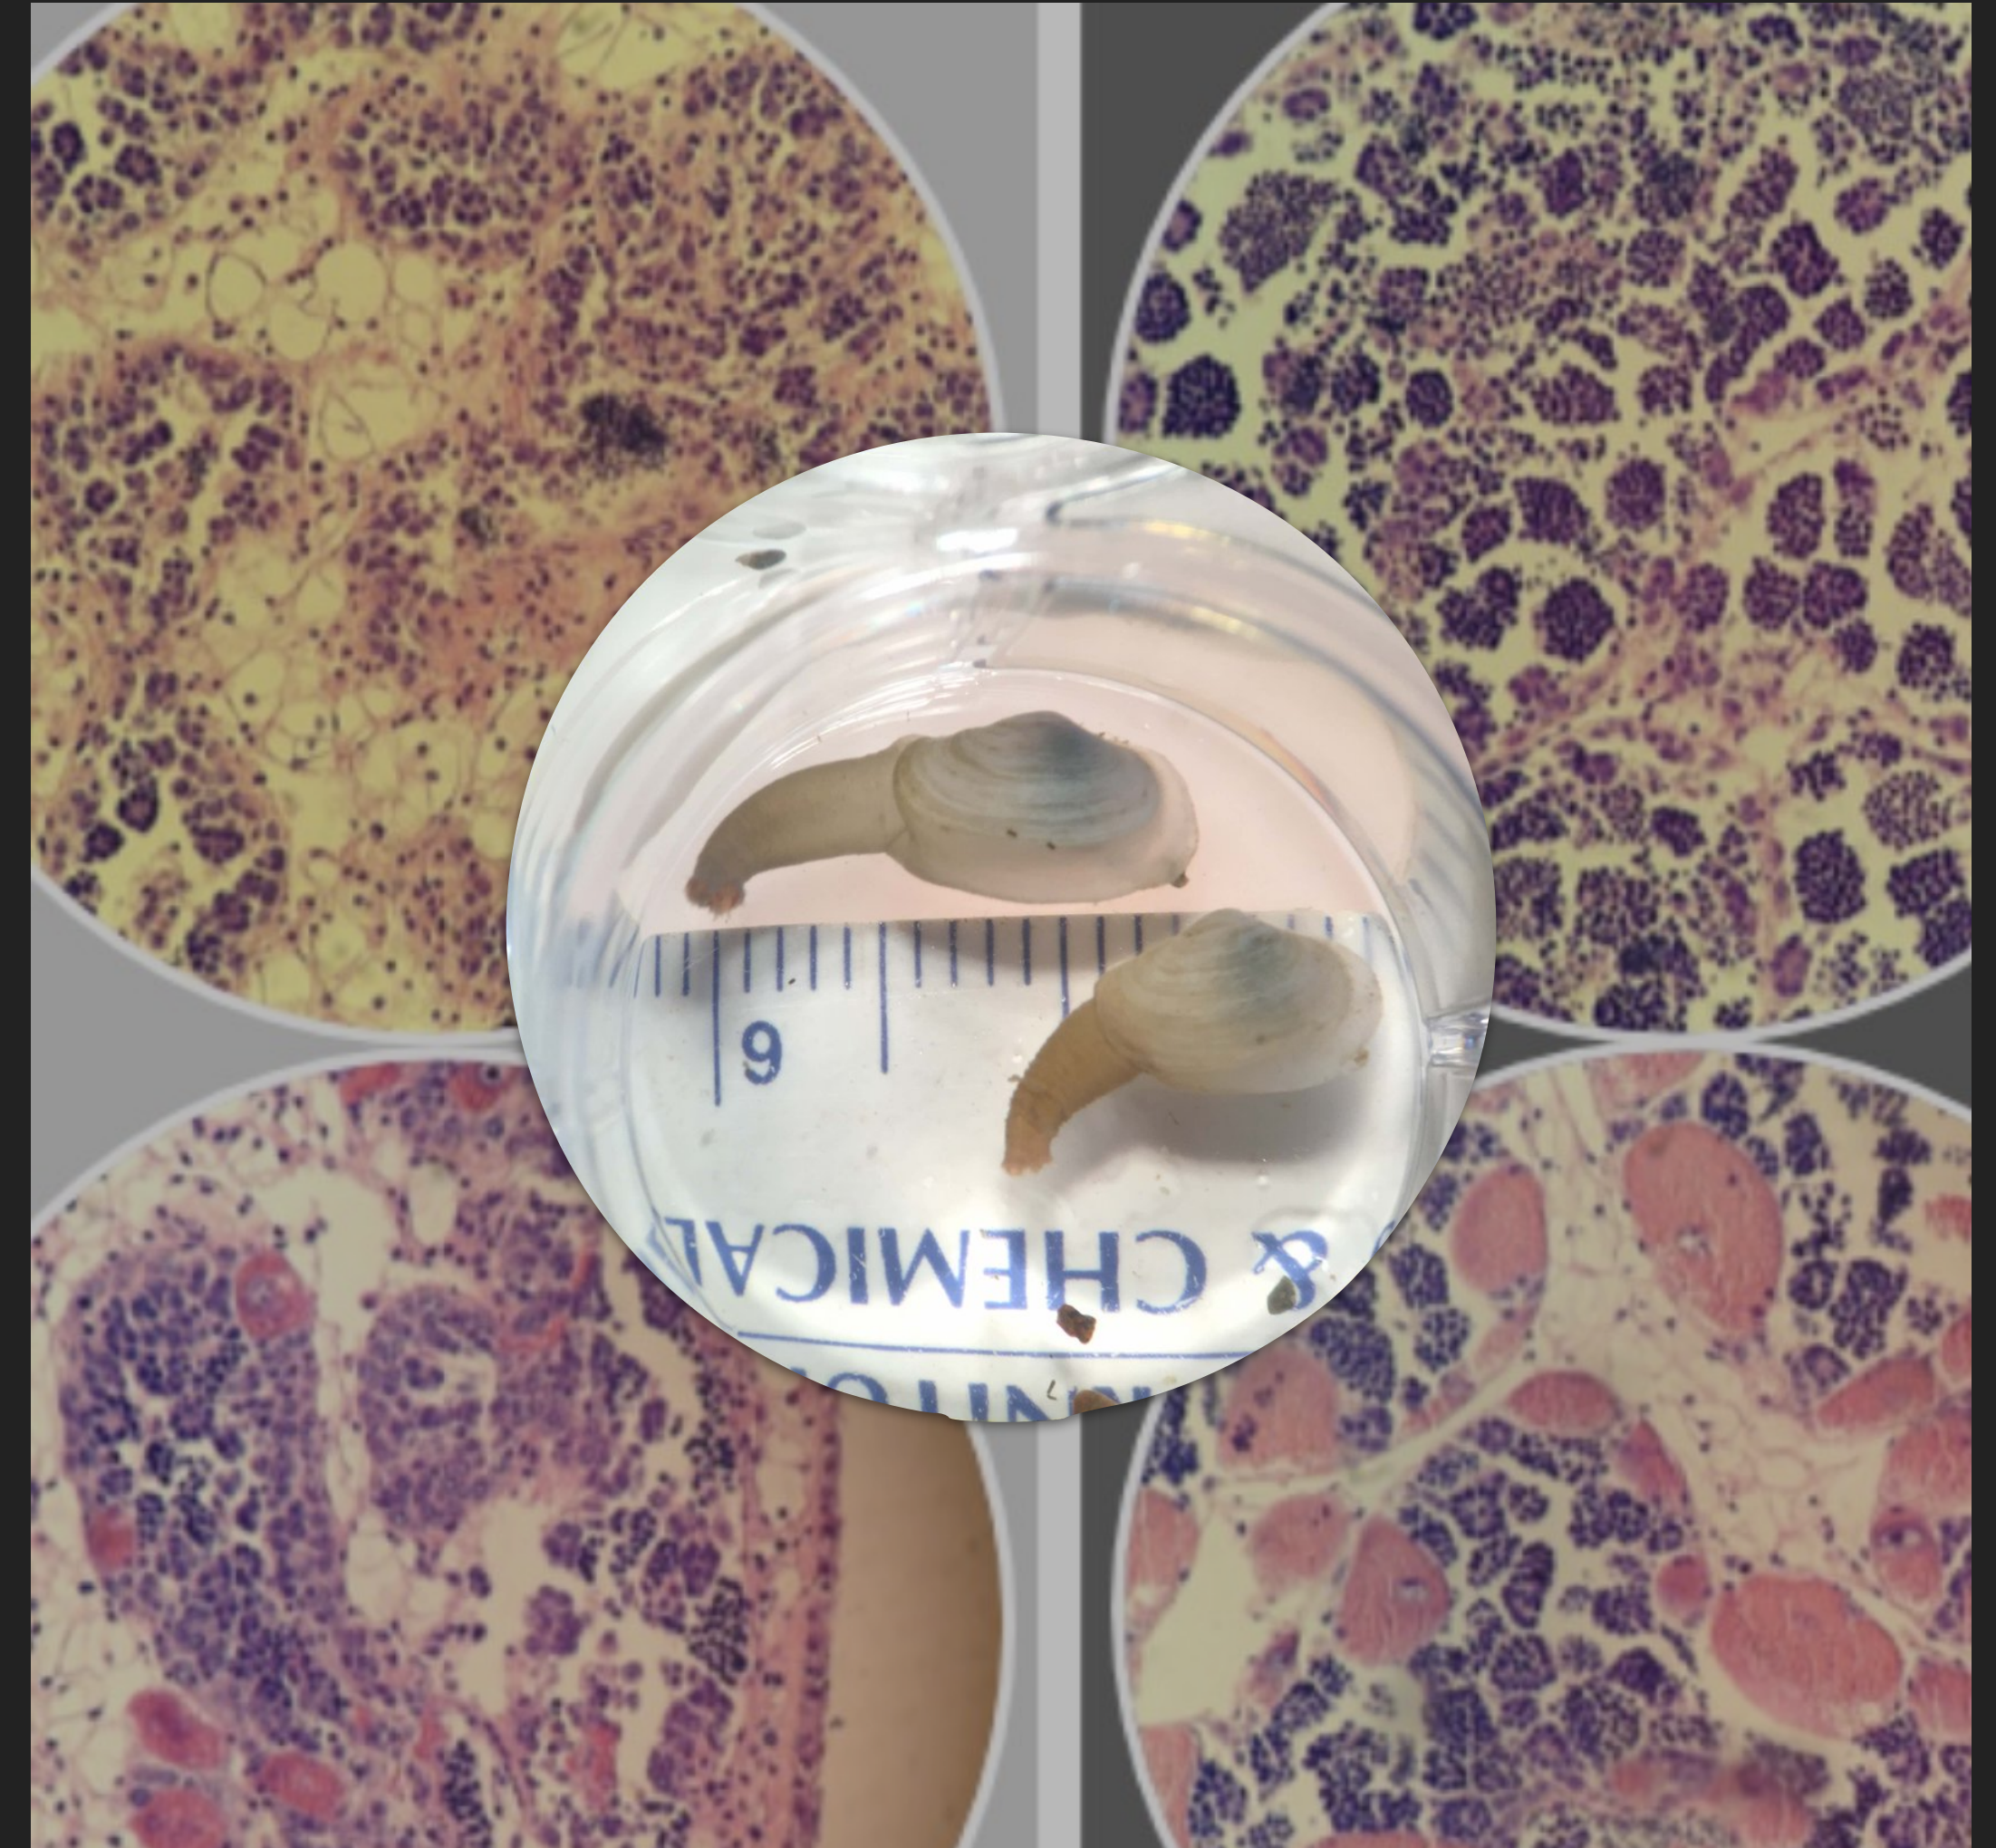

- ▶ Complicated
- ▶ Environmental exposure outside of gametogenesis has an impact
- ▶ Evidence for a beneficial impact of prior exposure
- ▶ Evidence for a negative impact of prior exposure
- ▶ Likely a combination of physiological burden and hardening

IMPLICATIONS FOR AQUACULTURE

SUMMARY

- ▶ Complicated
- ▶ Environmental exposure outside of gametogenesis has an impact
- ▶ Evidence for a beneficial impact of prior exposure
- ▶ Evidence for a negative impact of prior exposure
- ▶ Likely a combination of physiological burden and hardening

IMPLICATIONS FOR ECOSYSTEM RESILIENCE ?
