

◆ OLYMPIA OYSTER

◆ PACIFIC OYSTER

◆ GEODUCK

EFFECTS OF TEMPERATURE AND OA IN OLYMPIA OYSTER POPULATIONS

- ▶ Oysters were held at two temperature regimes (6°C and 10°C) for 60 days in December 2016
- ▶ A differential pCO₂ exposure was carried out after the temperature treatment ended. Held at ambient pCO₂ (841 µatm) or high pCO₂ (3045 µatm) for 52 days, during the Winter.
